

Maxime Grelet

System Engineer

Junior Aerospace Project Manager

After a system engineering master's degree at the Mines of Saint-Etienne school (France) I am currently following an Aerospace Project Management Advanced Master. During my education I have developed some technical skills but I have also learnt how to manage a project and a team. My different experiences have taught me how to solve issues and work with customers. I am looking for a challenging aerospace company to start my career. Available from September 2015.

»» JOB EXPERIENCE

FEB 2015
PRESENT
Airbus Helicopters
